

untagged, needs pic, incomplete

This recipe is tagged as incomplete, use at your own risk!

## Recipe Name

Date added: 2024/08/25

## Ingredients

- 2 cups water
- 1 cup sugar
- 1/2 cup dried spearmint

## Method

1. heat water and sugar in a large measuring cup in microwave to form simple syrup
2. add spearmint and return to microwave to ensure mixture boils
3. steep for at least 5 minutes
4. strain into 1/2 gallon mason jar. Top off with water until you have 9 cups total. Chill in the fridge.
5. This is a concentrate. Dilute at half strength.

## Notes

This is way to sweet and mild. Try again with less sugar and more tea or steeping longer over higher heat etc. Inspired by: *original recipe link*
